Discussions

You will be given two integer numbers **A** and **B** , you need to print the difference between these two numbers. Remember, difference is always positive.

Note: Use pointers to solve this Problem.

Input Format

- Input will contain two integers **A** and **B**.

Constraints

- $0 \leq A \leq 100$
- $0 \leq B \leq 100$

Output Format

- Print a single integer representing the absolute difference between A and B.

Sample Input 0

```
6 10
```

Sample Output 0

```
4
```
